#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Shastri (6,730,772).

The reference discloses a degradable copolymer comprising distributed units of a ring opened functionalized epoxide, corresponding to the claimed B unit, and a ring opened cyclic ester, corresponding to the claimed A unit in the claimed formula (1) (see cols. 29-30; claims 25-36) in that the ester linkage is derived from lactide, glycolide, caprolactone, 1,4-dioxan-2-one, and cyclic carbonates (see col. 29, claim 23).

Note that the polymerization of functionalized epoxides and cyclic esters are disclosed at col. 17, line 30 onto col. 18, line 33) and having the claimed MW (see col. 20, lines 17-25).
